

TIMIVIC SUNTECHNOLOGY

COMPLETE ABOUT US

Engineering Comfort. Restoring Reliability. Keeping Businesses Running.

Since 2013, Timivic Suntechnology has been helping homes, businesses, commercial facilities, and industrial environments stay cool, comfortable, and operational through dependable air-conditioning, refrigeration, and HVAC solutions.

What started with a commitment to provide reliable technical services has grown into a company built around technical competence, honest workmanship, responsive service, and a deep understanding of cooling and climate-control systems.

At Timivic Suntechnology, we understand that an air-conditioning or refrigeration system is more than just equipment.

For a home, it can mean comfort for your family.

For a restaurant or retail business, it can mean protecting valuable products.

For an office, hotel, hospital, factory, or industrial facility, it can mean maintaining the environment necessary for people, equipment, and operations to function effectively.

That is why we approach every project with one simple principle:

WE DON'T JUST FIX COOLING SYSTEMS. WE HELP KEEP PEOPLE, PRODUCTS, BUSINESSES, AND OPERATIONS RUNNING.

OUR STORY

Built From Technical Expertise. Driven by a Commitment to Better Service.

Established in 2013, Timivic Suntechnology was created with a clear purpose: to provide professional and dependable solutions for air-conditioning, refrigeration, and climate-control challenges.

Over the years, we have evolved alongside the technology and demands of the industry.

The cooling systems used today are increasingly sophisticated. From residential split-unit air conditioners to complex commercial installations and industrial HVAC systems, effective maintenance and repair require more than simply identifying a fault and replacing a component.

They require technical knowledge, proper diagnosis, attention to detail, appropriate equipment, and an understanding of how the entire system works together.

This philosophy has shaped the way Timivic Suntechnology operates.

Rather than treating every fault as a quick repair job, we believe in understanding the problem, identifying its underlying cause, and providing a solution that is appropriate for the system and the customer's needs.

Our experience across air-conditioning, refrigeration, and HVAC systems has allowed us to serve a wide range of customers and environments while continually strengthening our technical capabilities.

Today, Timivic Suntechnology stands as a HVAC and refrigeration solutions company committed to delivering dependable technical services from installation and commissioning to maintenance, repairs, and ongoing system support.

And while our services have grown, one thing has remained constant:

OUR COMMITMENT TO DOING THE JOB PROPERLY.

WHO WE ARE

Timivic Suntechnology is a professional Air Conditioning, Refrigeration and HVAC Solutions Company specializing in the installation, maintenance, servicing, troubleshooting, and repair of cooling and climate-control systems.

Our expertise covers both residential and commercial applications, as well as more demanding industrial HVAC environments.

We work with clients who need more than a technician who can simply "make the AC work."

They need a technical partner who understands the importance of:

- System efficiency
- Proper installation
- Preventive maintenance
- Accurate fault diagnosis
- Equipment longevity
- Energy-conscious operation
- Safety
- Reliability
- Professional workmanship

That is the standard we strive to bring to every project.

WHAT WE DO

Comprehensive Cooling & HVAC Solutions

Our services are designed to cover the lifecycle of cooling and climate-control equipment—from installation to maintenance, troubleshooting, repairs, and system support.

AIR CONDITIONING INSTALLATION

We provide professional air-conditioning installation for residential, commercial, and other applicable environments.

Our approach goes beyond mounting an indoor and outdoor unit. We consider factors such as the space, cooling requirements, equipment capacity, installation conditions, piping, drainage, electrical considerations, airflow, and overall system performance.

The goal is to ensure that the installed system is properly configured to deliver reliable and efficient cooling.

AIR CONDITIONING REPAIRS

When an air conditioner stops cooling properly, begins leaking, makes unusual sounds, trips electrical protection, or develops another fault, accurate diagnosis is essential.

Our technicians troubleshoot AC systems to identify the source of the problem before carrying out the appropriate repair.

Depending on the fault, this may involve electrical components, refrigeration circuits, controls, fans, compressors, drainage systems, sensors, or other system components.

We focus on resolving the actual problem rather than simply treating the symptoms.

AIR CONDITIONING SERVICING & PREVENTIVE MAINTENANCE

Regular servicing can play an important role in maintaining the performance and reliability of an air-conditioning system.

Our servicing solutions are designed to help identify developing problems, maintain system cleanliness, support proper airflow, and keep equipment operating as effectively as possible.

Preventive maintenance is particularly important for businesses and facilities where unexpected equipment failure can disrupt daily operations.

Our philosophy is simple:

IT IS BETTER TO MAINTAIN A SYSTEM CONSISTENTLY THAN TO WAIT UNTIL A PREVENTABLE PROBLEM BECOMES AN EXPENSIVE BREAKDOWN.

REFRIGERATOR REPAIRS

Refrigeration equipment plays an important role in homes, businesses, restaurants, retail environments, hospitality facilities, and other applications.

When refrigeration equipment fails, the consequences can extend beyond inconvenience. It can result in spoiled products, operational downtime, and financial losses.

Timivic Suntechnology provides refrigerator troubleshooting, servicing, and repair solutions aimed at restoring dependable cooling performance and helping customers protect their equipment and valuable contents.

COMMERCIAL HVAC SOLUTIONS

Commercial environments often require cooling systems capable of operating for extended periods while maintaining consistent indoor conditions.

We provide HVAC services for commercial environments, supporting businesses with installation, servicing, maintenance, troubleshooting, and repair requirements.

Our approach takes into consideration the operational demands of the facility and the importance of minimizing unnecessary downtime.

INDUSTRIAL HVAC SYSTEMS

Industrial environments demand a higher level of technical consideration.

HVAC systems may operate across large spaces, support specialized processes, protect equipment, regulate environmental conditions, or operate continuously under demanding circumstances.

Timivic Suntechnology provides technical services related to industrial HVAC systems and affiliated cooling applications.

Our focus is on understanding the requirements of the environment, maintaining system reliability, and providing technically appropriate solutions.

HVAC MAINTENANCE & TECHNICAL SUPPORT

HVAC systems perform best when they are properly maintained.

We provide maintenance and technical support aimed at helping clients identify issues early, maintain system performance, extend equipment service life, and reduce unexpected interruptions.

For businesses and facilities with critical cooling requirements, consistent technical support can make a significant difference.

OUR MISSION

To Deliver Reliable Cooling and HVAC Solutions Through Technical Excellence and Exceptional Service.

Our mission is to provide dependable, professional, and technically sound air-conditioning, refrigeration, and HVAC solutions that improve comfort, protect valuable assets, and support the uninterrupted operation of homes, businesses, and industrial facilities.

We are committed to combining technical expertise, quality workmanship, responsible service, and customer understanding in every project we undertake.

We don't measure our work only by whether a system starts working again. We measure it by the quality of the solution, the reliability of the result, and the confidence our customers have when they call us.

OUR VISION

To Become a Trusted Leader in HVAC, Air Conditioning and Refrigeration Solutions.

Our vision is to build Timivic Suntechnology into a recognized and trusted technical solutions company known for professionalism, engineering excellence, innovation, reliability, and exceptional customer service.

We aspire to be the company customers and organizations can confidently turn to when they need dependable cooling and HVAC solutions—from everyday residential requirements to complex commercial and industrial applications.

As technology continues to evolve, our goal is to evolve with it.

We are committed to continuously improving our knowledge, processes, tools, and service delivery so that we remain relevant and capable of solving the increasingly complex demands of modern cooling and climate-control systems.

OUR CORE VALUES

01 — INTEGRITY

We believe trust is earned through honesty. We communicate with our customers clearly, provide professional recommendations, and strive to be transparent about the work required.

We don't believe in creating unnecessary problems just to create unnecessary bills.

We believe in solving the problem responsibly.

02 — TECHNICAL EXCELLENCE

HVAC and refrigeration systems require technical understanding.

We value continuous learning, accurate diagnosis, proper procedures, and attention to detail.

Our commitment is to continually improve our technical capabilities and deliver work that reflects professional standards.

03 — QUALITY WORKMANSHIP

A repair may be temporary, but good workmanship should stand the test of time.

We pay attention to the details that can influence system performance—from installation practices to maintenance procedures and component replacement.

We aim to do the job right, not merely do the job quickly.

04 — RELIABILITY

Our customers depend on their cooling systems.

We understand that.

That is why reliability is at the heart of our service philosophy.

We strive to provide solutions that customers can depend on and service they can confidently return to whenever technical support is required.

05 — CUSTOMER COMMITMENT

Every customer has a different environment, requirement, and budget.

We take the time to understand the situation before recommending an appropriate solution.

Our relationship with a customer should not end when the technician leaves the site.

We aim to build long-term relationships based on trust, service, and results.

06 — SAFETY

HVAC and refrigeration work involves electrical systems, pressurized refrigerants, mechanical components, tools, and equipment.

Safety is therefore not optional.

We are committed to approaching our work with appropriate attention to safety, responsible procedures, and protection of people, property, and equipment.

07 — PROFESSIONALISM

From communication and punctuality to technical execution and site conduct, professionalism influences the entire customer experience.

We strive to represent Timivic Suntechnology with discipline, respect, competence, and accountability at every stage of a project.

08 — CONTINUOUS IMPROVEMENT

Technology does not stand still, and neither do we.

We believe in learning, adapting, improving our processes, and staying informed about developments within the HVAC and refrigeration industry.

Every project is an opportunity to become better at what we do.

OUR ENGINEERING & TECHNICAL STANDARDS

Built Around Proper Diagnosis, Proper Installation and Proper Maintenance.

At Timivic Suntechnology, we believe quality HVAC service begins with a proper technical approach.

Our engineering philosophy is built around several fundamental principles.

ACCURATE DIAGNOSIS

We seek to understand the cause of a fault before recommending a repair.

A symptom may point to several possible causes. Proper troubleshooting helps prevent unnecessary component replacement and recurring failures.

CORRECT EQUIPMENT SELECTION

The right equipment matters.

Cooling capacity, application, operating environment, installation conditions, and system requirements should be considered when selecting HVAC and refrigeration equipment.

PROPER INSTALLATION PRACTICES

Installation quality directly affects equipment performance and longevity.

We pay attention to the technical requirements involved in installation, including appropriate positioning, refrigerant piping, drainage, electrical connections, airflow, and other relevant installation considerations.

PREVENTIVE MAINTENANCE

We encourage customers to view maintenance as an investment rather than an expense.

Routine inspection and servicing can help identify problems early, maintain performance, and reduce the likelihood of unexpected breakdowns.

SAFETY-CONSCIOUS WORK

Our technical activities are approached with consideration for electrical, mechanical, refrigeration, and environmental risks.

Safety remains an essential part of responsible HVAC and refrigeration work.

SYSTEM EFFICIENCY

A system that cools is not necessarily a system operating efficiently.

We consider factors that can influence performance and energy consumption and seek practical solutions that help systems operate effectively.

PROFESSIONAL DOCUMENTATION & ACCOUNTABILITY

For applicable projects, proper documentation, service records, maintenance schedules, equipment information, and technical observations can help customers better understand the condition and history of their systems.

Good engineering is not only about what happens on site.

IT IS ALSO ABOUT ACCOUNTABILITY.

WHY CHOOSE TIMIVIC SUNTECHNOLOGY?

Because Your Cooling System Deserves More Than a Quick Fix.

Choosing an HVAC service provider is ultimately about trust.

You are trusting someone with equipment that may represent a significant investment.

You are trusting them to diagnose problems correctly.

You are trusting them to recommend appropriate solutions.

And you are trusting them to work safely and professionally.

At Timivic Suntechnology, we understand that responsibility.

OVER A DECADE OF EXPERIENCE

Established in 2013, we have built our experience through years of working with air-conditioning, refrigeration, and HVAC systems.

BROAD TECHNICAL CAPABILITY

From residential air conditioners and refrigerators to commercial and industrial HVAC applications, our scope allows us to approach cooling challenges from a broader technical perspective.

PROBLEM-SOLVING APPROACH

We don't simply look at what has stopped working.

We look at why it stopped working and what needs to be done to restore reliable performance.

CUSTOMER-FOCUSED SERVICE

We believe technical excellence and good customer service should go together.

Our customers deserve clear communication, respectful service, and practical solutions.

LONG-TERM THINKING

Our goal is not simply to complete today's job.

We want to help customers maintain reliable systems and make informed decisions about their cooling and HVAC equipment over time.

OUR COMMITMENT TO OUR CUSTOMERS

At Timivic Suntechnology, we understand that every service call represents someone's home, business, investment, or livelihood.

That responsibility matters to us.

We are committed to approaching every project with professionalism and respect, regardless of whether it is a small residential repair or a larger commercial or industrial requirement.

Our promise is straightforward:

LISTEN CAREFULLY. DIAGNOSE PROPERLY. WORK PROFESSIONALLY. COMMUNICATE HONESTLY. DELIVER RELIABLY.

That is the standard we continue to build our company around.

LOOKING AHEAD

The future of cooling and climate-control technology is changing rapidly.

Energy efficiency, smart systems, automation, environmental considerations, improved refrigeration technologies, and increasingly sophisticated HVAC equipment are reshaping the industry.

Timivic Suntechnology intends to remain part of that future.

We are committed to expanding our technical capabilities, embracing better technologies, strengthening our service systems, and developing the expertise required to support modern HVAC and refrigeration environments.

Our ambition is not simply to grow bigger.

IT IS TO BECOME BETTER, MORE CAPABLE, AND MORE VALUABLE TO THE PEOPLE AND ORGANIZATIONS WE SERVE.

OUR STORY CONTINUES

From our establishment in 2013 to the work we do today, Timivic Suntechnology has been built around a simple belief:

RELIABLE TECHNICAL SERVICE SHOULD BE DELIVERED WITH COMPETENCE, INTEGRITY, AND CARE.

Every installation.

Every service call.

Every repair.

Every maintenance visit.

Every industrial HVAC project.

Each one is an opportunity to reinforce that belief.

We are proud of where we have come from, but we are even more focused on where we are going.

TIMIVIC SUNTECHNOLOGY

Keeping comfort, cooling and critical systems working.

Established 2013.

Let's Keep Your System Running.

Whether you require air-conditioning installation, repair, routine servicing, refrigerator repairs, commercial HVAC support, industrial HVAC solutions, or other cooling-related technical services, our team is ready to help.

Reliable systems start with the right technical partner.
